📋 CAREER OBJECTIVE

Final-year Electronics and Communication Engineering student with hands-on experience in embedded systems, IoT, and software development. Proficient in C, Python, ESP32, and Arduino, with a strong foundation in problem-solving and engineering design. Eager to apply technical skills, learn emerging technologies, and contribute to innovative software and digital engineering solutions.

🎓 EDUCATION

Bachelor of Technology in Electronics and Communication Engineering, 2023 – 2027
NMAM Institute of Technology Nitte, Karkala
CGPA 7.02/10

PUC, Sharada PU College 2021 – 2023
Kodialbail, Mangalore

SSLC, St. Michael's School 2020 – 2021
Madikeri, Kodagu

📁 PROFESSIONAL EXPERIENCE

Electronics Product Development Intern, Experimind Labs Pvt. Ltd 06/2025 – 07/2025

- Assisted in electronics product development, circuit implementation, and hardware testing.
- Performed system integration, troubleshooting, and validation of embedded solutions.
- Strengthened practical problem-solving and teamwork skills through real-world projects.

College Research Internship, JAXA Mission Study 10/2023 – 05/2024

- Conducted a research study on JAXA space missions, analyzing mission success, failures, and technological advancements.
- Enhanced analytical, research, and technical documentation skills through structured mission analysis.

🧠 TECHNICAL SKILLS

- **Programming:** C | Python | Embedded C
- **Embedded & IoT:** ESP32 | Arduino Uno | RFID (MFRC522) | Sensor Integration | Wi-Fi Communication | IoT Systems
- **Tools:** Arduino IDE | VS Code | Git | GitHub
- **Hardware:** Circuit Implementation | Hardware Troubleshooting | Soldering | Servo Motors | Motor Drivers

🧩 SOFT SKILLS

Problem Solving | Team Collaboration | Communication | Time Management | Adaptability

PROJECTS

Smart Warehouse Management System (RFID + ESP32)

Developed an IoT-based warehouse automation system using **ESP32**, **RFID**, **LCD Display**, and **Wi-Fi** for product identification, inventory tracking, and automated sorting.

Sudoku Solver – Python

Developed a Sudoku solver using **Python** and the **Backtracking Algorithm**, demonstrating problem-solving, **recursion**, and algorithmic thinking.

Driver Drowsiness Detection System – ESP32

Developed an **ESP32**-based driver safety system that detects drowsiness, triggers real-time alerts, slows the vehicle, and sends emergency notifications to improve road safety.

Automated Baby Cradle Using ESP32

Developed an IoT-based smart cradle using **ESP32**, **Sound Sensor**, and **Servo Motor** to detect infant crying and automatically initiate a rocking mechanism.

Password Detection System – Verilog

Implemented an **FSM**-based password detection system in **Verilog**, demonstrating digital logic design and **HDL programming**.

Line Follower Robot – Arduino Uno

Developed an autonomous line follower robot using **Arduino Uno**, **IR Sensors**, and **Motor Drivers** for real-time path detection and navigation.

Arduino Sensor Integration Project

Integrated **Ultrasonic**, **IR**, **Motion**, and **Soil Moisture Sensors** with **Arduino Uno** to develop real-time sensing and automation applications.

ACTIVITIES AND LEADERSHIP

Class Representative | First Year & Third Year

Represented the class by coordinating with faculty and students, communicating academic updates, and assisting in resolving student concerns.

Core Member (Inventory) – Electronics Project Club (EPC)

Managed inventory of electronic components and tools, ensuring resource availability for technical projects and club activities.

Volunteer – Thorana 2025, Incridea

Assisted in event coordination, logistics, and smooth execution of college cultural and technical events.

Technical Volunteer – Lazzerena, Incridea 2025

Supported event management and provided technical assistance during the competition.
